

Efficient bedding dispensing and disposal, custom designed for vivarium environments

Cage Dump Station confines materials without dusting, odors, contamination or spillage.

Patented air-over-hydraulic autotensioner mitigates unplanned downtime and dramatically reduces maintenance.

Low-horsepower, electric motor drives material for hundreds of feet using minimal energy.

Continuously convey materials up to 50 ft³/min. (1.4 m³/min.) in *any* direction.

Convey any bedding and feed in a completely sealed system.

Integral, self-cleaning system with motorized brushes, spray nozzles and compressed air nozzles.

Chain and flight design options engineered for optimal performance.

A true performance guarantee ensuring your Hapman equipment achieves the specific results it was designed and manufactured to deliver. And if you need technical support, call us. We are available 24/7.

CONVEYORS

Tubular Drag

WITH CAGE DUMP STATION

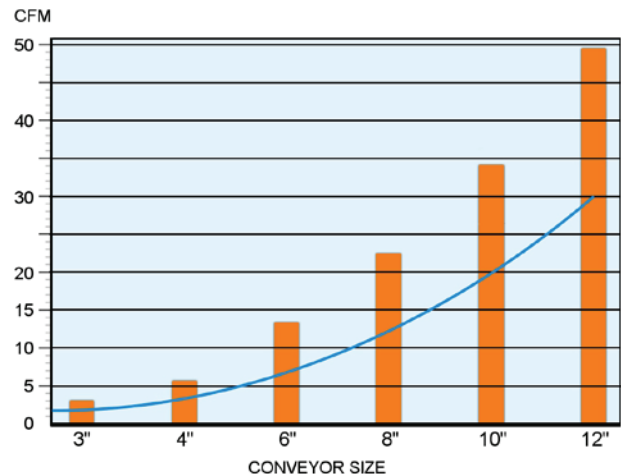

Keep material contained and the work environment safe.

- **Convey bedding in a completely sealed system.** The sprocket drive slowly pulls a heavy-duty chain through a fully enclosed casing. As the chain moves material through the tube, there are no dusting or spillage issues.
- **Cost-effective operation.** The low-horsepower motor produces a slow, steady chain movement that offers reliable operation in an energy efficient way.
- **Move challenging materials with little maintenance.** Convey high-moisture, abrasive, easy-to-compact or smear materials without compromising operation.
- **One conveyor does the work of several.** Configure the tubular drag to convey material vertically, horizontally, at any angle and around corners. Multiple inlets and outlets allow for collective points throughout vivarium operations.
- **Equipped for vivarium facilities.** Multiple filters assure only clean air is returned into the room. Integral exhaust fan creates negative pressure inside hood to contain dust and odor.

Specifications

PIPE CASING DIAMETER	3 in (76 mm) to 12 in (300 mm) diameter. See graph.
PIPE CASING MATERIAL	Carbon steel
	Stainless steel
CHAIN MATERIAL	Carbon steel
	Stainless steel
CIRCULAR FLIGHTS	Cast iron, ductile iron, nylon, stainless steel, UHMW polyethylene, Tivar® H.O.T. premium UHMW polyethylene or custom
MAXIMUM CONVEYANCE DISTANCE	85 ft vertically (26 m)
	400 ft horizontally (122 m)

800-427-6260 (US/Can) or 269-343-1675
fax 269-349-2477
